

Remote Deposit Capture

Remote Deposit Capture (RDC) is a type of technology that allows your business to deposit checks into your bank account without physically going to the bank. Instead of mailing or handing over a check, you use a scanner to take a picture of the check and send it electronically to the bank for processing.

*Utilizes **Remote Deposit Capture (RDC)** software installed on your computer and a check scanner to securely deposit checks directly from your business location. One of our IT experts will assist you with the software installation.

*Ideal for businesses with high check volume, reducing trips to the bank and streamlining operations.

*Offers ease and convenience, with quick processing and user-friendly interface for efficient check handling.

What's the cost?

\$50-\$100/month

What are the Benefits?

- No check deposit runs to the bank
- Deposit multiple checks in one transaction
